Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25 and 84, drawn to methods for producing a cell comprising a modified foreign chromosome(s) or fragments thereof and cells comprising a recombinant chromosome(s) or fragment(s) thereof.

Group II, claim(s) 26-77, 82 and 83, drawn to methods for producing chimeric avian comprising a modified foreign chromosome(s) or fragment(s) thereof, methods for producing avian comprising a modified foreign chromosome(s) or a fragment(s) thereof, and avian produced by the claimed method.

Group III, claim(s) 26-37, 39-57, 59-81, drawn to methods for producing chimeric non-human animal comprising a modified foreign chromosome(s) or fragment(s) thereof, methods for producing non-human animals comprising a modified foreign chromosome(s) or a fragment(s) thereof, non-human animals produced by the claimed method, wherein the non-human animals are mice, ungulata, bovine, and ovine.

Group IV, claim(s) 85, drawn to a method for modifying a foreign chromosome(s) or a fragment thereof in a cell.

Group V, claim(s) 86-92, drawn to artificial chromosome vectors.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

37 CFR 1.475(c) states:

"If an application contains claims to more or less than one of the combination of categories of invention set forth in paragraph (b) of this section, unity of invention might not be present."

37 CFR 1.475(d) also states:

"If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application and the first recited invention of each other categories related thereto will be considered as the main invention in the claims, see PCT Article 17(3)(a) and 1.476(c)."

37 CFR 1.475(e) further states:

"The determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternative within a single claim."

The claimed inventions of Group II-V recite distinct materials and/or methods steps that are neither required nor recited in the claimed invention of Group I, and thus lack the same or corresponding technical feature for the following reasons:

The special technical feature of Group I is considered to be a cell comprising modified foreign chromosome(s) or fragment(s) thereof.

The special technical feature of Group II is considered to be avian comprising a modified foreign chromosome(s) or a fragment(s) thereof.

The special technical feature of Group III is considered to be non-human animals comprising a modified foreign chromosome(s) or a fragment(s) thereof, wherein the non-human animals are mice, ungulata, bovine, and ovine.

The special technical feature of Group IV is considered to be modified foreign chromosome(s) or a fragment thereof in a cell.

The special technical feature of Group V is considered to be artificial chromosome vectors.

Accordingly Groups I-V are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

The inventions listed as Groups I-V do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the reasons set forth above.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
